# 2. はじめに

# 2.1. 本書の目的

本書は上位文書[1]に基づき、各 ECU において実施しなければならない要件を示す。なお、MM 個別の要件については、4.2 参照のこと

# 2.2. 要求事項の記載

【要求事項: PPIREQ\_\*\*\*\*\*】と記載されている部分が本書の要件とする。ただし、(補足)と記載されているものは補足事項のため要件ではない。

# 2.3. 関連文書

本書の上位文書を以下に示す。

表 1 上位文書

4. 機能要求詳細

# 4.1. 個人・プライバシー情報の消去機能要件

#### <対象 ECU>

・個人・プライバシー情報を保持・保存している ECU の内、『車載個人・プライバシー情報対策基準』 表4.1.の消去対象外にできるものにあたらない情報を保持・保存する ECU

# <導入時期>

- ・19PF Ver.2 以降での ECU 開発の新設、または改良等の変更のタイミング
- ・Post19PF 以降の車両開発のタイミング

# <要件>

# 【要求事項: PPIREQ\_01001】

- ・対象 ECU は、下記 1,2 の少なくとも 1 つの機能を実装し、保持している個人・プライバシー情報を完全消去できること。ただし、消去対象の情報が上位文書[1]に記載の低レベルの情報に該当する場合は、完全消去でなくても可。
  - 個人・プライバシー情報の消去要件は、上位文書[1]参照。
    - 1. お客様操作による消去機能(HMI操作、スイッチ操作など)
    - 2. ディーラ作業による消去機能(サービスツールでのダイアグコマンド指示など)※1
- ※1: ディーラでの操作による消去を実装する場合、お客様に対し、ディーラで消去可能な旨をオーナーズマニュアル等で連絡すること
- (補足) お客様、またはディーラにて、個人・プライバシー情報を完全消去できる別の手段が実装されている場合、新たに消去機能を実装する必要なし

# 4.1.1. ディーラ作業による消去機能を実装する場合の要件

本項では、【要求事項: PPIREQ\_01001】にてディーラ作業による消去機能を実装する場合の要件を 規定する。既に本節とは別の手段でディーラ作業による消去機能を実装している場合や、お客様操作に よる消去機能のみを実装する場合は、本節の要求事項は対応不要である。

# 4.1.1.1. 機能要件

#### 【要求事項: PPIREQ 01002】

ディーラ作業による個人・プライバシー情報の消去機能を実装する ECU は、表 4-1 に示す機能を有すること。コマンドを受け付けるセッション、およびセキュリティアクセス解除の要否についても表 4-1 に従うこと。

| In-Vehicle Network   | Requirements of Personal and Privacy Information |  |                               |      |  |
|--|--|--|-------------------------------|------|--|
| Application: ECUs which process personal and privacy information |  |  | SEC-ePF-PPI-REQ-S<br>a00-01-a | PEC- |  |

# 表 4-1 個人・プライバシー情報消去機能

| 機能名      | 概要             | ID                | 受付ty   | ション | セキュリティ |
|----------|----------------|-------------------|--------|-----|--------|
|          |                |                   | テ゛フォルト | 拡張  | アクセス解除 |
| 個人・プライバシ | ツールからの要求に対し、保持 | SID\$31           | 0      | 0   | 不要     |
| 一情報消去機能  | する個人・プライバシー情報を | RID\$1016(Phase5) |        |     |        |
|          | 消去する。          | RID\$D906(Phase6) |        |     |        |

# 【要求事項: PPIREQ\_01003】

IG-ON 中にツールから個人・プライバシー情報消去の subFunction - startRoutine リクエストを受信した場合、保持している個人・プライバシー情報を消去すること。

# 【要求事項: PPIREQ\_01004】

個人・プライバシー情報消去中に、IG OFF となった場合、個人・プライバシー情報の消去を中止すること。

#### 【要求事項: PPIREQ 01005】

個人・プライバシー情報消去中に、個人・プライバシー情報消去の subFunction - startRoutine リクエストを受信した場合は、個人・プライバシー情報の消去処理を継続すること。

#### 【要求事項: PPIREQ\_01006】

subFunction - requestRoutineResults のリクエストを受信した場合は、4.1.1.2 に示す状態遷移の制御ステータスを応答すること。

#### 【要求事項: PPIREQ\_01007】

subFunction - stopRoutine は非対応とする。stopRoutine のリクエストを受信した場合は、ネガティブレスポンス(NRC 0x12)を応答すること。個人・プライバシー情報を消去中であれば、個人・プライバシー情報の消去処理を継続すること。

# 【要求事項: PPIREQ\_01008】

セッション移行は処理継続とする。状態遷移は実施せず、個人・プライバシー情報消去中であれば、個人・プライバシー情報の消去処理を継続すること。

# 4.1.1.2. 状態遷移

#### 【要求事項: PPIREQ\_01009】

個人・プライバシー情報消去機能の状態遷移は、図 4-1 および表 4-2 に従うこと。

#### TOYOTA MOTOR CORPORATION

# 4.2. MM(マルチメディア)向け個人・プライバシー対策要件

本節では、MM 個別の要件を規定する。本章で記載する要件は、下記対象 ECU と対象導入時期に適用される。

#### <対象 ECU>

• MM

#### <導入時期>

-MM: 21CY 以降

# 4.2.1. MM (マルチメディア) 向け個人・プライバシー情報の機密保護要件

本項では、MM 向けの個人・プライバシー情報の機密保護要件を規定する。

# 【要求事項: PPIREQ\_02004】

・MM の UI を介したユーザ操作により + B 電源 ON 時にユーザ認証を設定可能なこと。 + B 電源 ON 時からユーザ認証が成功するまでの間は、MM の UI およびユーザが使用するデータ出力 I/F に個人・プライバシー情報を出力・表示しないこと。

# 【要求事項: PPIREQ\_02005】

・MM の UI を介したユーザ認証により、MM の個人・プライバシー情報の出力・表示を許可/禁止する設定が可能なこと。

# 【要求事項: PPIREQ\_02006】

・MM は、無線 I/F 経由で個人・プライバシー情報を出力する際は、通信路を暗号化すること

#### 【要求事項: PPIREQ\_02007】

・MM において個人認証(例: FIDO 認証)の機能を提供する場合は、あるユーザが入力した情報を その他のユーザが MM の UI を介して閲覧できないようにすること。ただし、この事項は推奨とする。

#### 【要求事項: PPIREQ\_02008】

・MM は、不揮発メモリ上に上位文書[1]で定義される暗号化保存の対象情報を保存する際は、暗号化して保存すること。耐タンパ性を持つセキュリティチップを暗号鍵の保護および暗号化処理に利用すること。

#### 【要求事項: PPIREQ 02009】

・MM は、車載 LAN 通信用コネクタから個人・プライバシー情報を出力する際は、アクセス制御かつ暗号化をすること(個人財産情報は必須、その他は推奨)

#### TOYOTA MOTOR CORPORATION

| In-Vehicle Network                    | Requirements of Personal and | d Priva | acy Information               | 14 / 14 |
|---------------------------------------|------------------------------|---------|-------------------------------|---------|
| Application: ECUs which p information | rocess personal and privacy  | No.     | SEC-ePF-PPI-REQ-S<br>a00-01-a | PEC-    |

# 【要求事項: PPIREQ\_02010】

・MM は、外部記録媒体等のユーザが容易に取出し・読出し可能な領域に個人・プライバシー情報を出力する際は、暗号化すること。ただし、出力の目的が、自宅 PC での閲覧のように、ユーザが車両外部に情報を持出すことを想定したサービスである場合は、暗号化しなくてもよい。

# 【要求事項: PPIREQ\_02011】

・MMのUIを介して個人財産情報を出力・表示しないこと。

#### 【要求事項: PPIREQ\_02012】

・MMは、DLC経由で個人財産情報を出力しないこと。

# 【要求事項: PPIREQ\_02013】

・MM は、外部記録媒体等のユーザが容易に取出し・読出しが可能な領域に個人財産情報を出力しないこと。

# 4.2.2. MM (マルチメディア) 向け個人・プライバシー情報の消去機能要件

本項では、MM 向けの個人・プライバシー情報の消去機能要件を規定する。

# 【要求事項: PPIREQ\_02014】

・MM は、メモリ上に上位文書[1]で定義されるデータ消去の対策情報を保存するときは、ユーザによる MM の UI を介した消去操作により、完全消去が可能なこと。

# 2. Introduction

# 2.1. Purpose of this document

This document will indicate the requirements that have to be fulfilled at the individual ECUs based on Upper-level Document[1].

Refer to chapter 4.2 for MM-specific requirements.

# 2.2. Description of Requirements

A requirements in this document shall be labeled as 【Requirement: PPIREQ\_\*\*\*\*\*】. Provided, however, that what is labeled as (Supplement) in this document is a supplementary item and therefore it is not a requirement.

# 2.3. Reference Documents

Upper-level Documents of this document are shown in Table 1.

Table 1. Upper-level Documents

<sup>\*1</sup> If erasing function by dealer operation using a different method this document has already implemented on the target ECU, or if only erasing function by user operation is implemented on the target ECU, the requirements need not be satisfied. For more details, see section 4.1.be satisfied. For more details, see section 4.1.

| In-vehicle Network   | Requirements of Personal and Privacy Information |  |                     | 6/14       |
|--|--|--|---------------------|------------|
| Application: ECUs which process personal and privacy information |  |  | SEC-ePF-PPI-REQ-SPE | EC-a00-01- |

- 4. Functional Requirements
- 4.1. Functional Requirements for Erasing of Personal and Privacy Information <a href="Target ECUs">Target ECUs</a>

Of the ECUs retaining and/or storing personal and privacy information, the target ECUs are the ECUs that retain and/or store the information that does not fall under the information that can be exempted from erasing as indicated in Table 4.1. of Upper-level Document[1].

- < Target timing of implementation >
  - · Changing including new adoption or improvement of ECU development for 19PF Ver. 2 and later
  - · Developing vehicles for Post19PF and later

#### <Requirements>

[Requirement: PPIREQ\_01001]

• Target ECU shall be implemented at least one function in the following two functions and perform complete erasing of personal and privacy information of itself by the erasing function.

However, if the information to be erased falls under "Low privacy" information described in Upper-level Document[1], complete erasing does not have to be performed. See Upper-level Document[1] for the erasing requirements (including requirements of complete erasing).

- 1. Erasing function by user operation (Operating HMI, Pushing button, etc.)
- 2. Erasing function by dealer operation (Erasing request from diagnostic tool, etc.) \*1
- \*1: If erasing function by dealer operation is implemented, the ECU design department shall inform user by owner's manual etc. that Personal and Privacy information is able to be erased at dealer.

(Supplement) Additional implementation of erasing functions is not required if users or dealers have been provided other means to performed complete erasing for Personal and Privacy information of the ECU.

#### 4.1.1. Requirements for Implementing Erasing function by Dealer Operation

This subsection indicates the requirements for implementing erasing function by dealer operation in [Requirement: PPIREQ\_01001]. If erasing function by dealer operation using a different method from in this section has already implemented on the target ECU, or if only erasing function by user operation is implemented on the target ECU, the requirements in this section need not be satisfied.

| In-vehicle Network   | Requirements of Personal and Privacy Information |  |                     | 7/14       |
|--|--|--|---------------------|------------|
| Application: ECUs which process personal and privacy information |  |  | SEC-ePF-PPI-REQ-SPE | EC-a00-01- |

# 4.1.1.1. Functional Requirements

[Requirement: PPIREQ\_01002]

The target ECU that implements erasing function by dealer operation shall have the function as indicated in Table 4-1. A session in which a command is accepted, and the necessity of cancellation of security access shall also comply with Table 4-1.

Table 4-1 Personal and Privacy Information Erasing Function

| Function name    | Outline                        | ID                | Acceptance | e session | Cancellation of |
|------------------|--------------------------------|-------------------|------------|-----------|-----------------|
|                  |                                |                   | Default    | Extension | security access |
| Personal and     | In response to request from    | SID\$31           | 0          | 0         | Not required    |
| privacy          | the tool, the target ECU       | RID\$1016(Phase5) |            |           |                 |
| information      | erase the personal and         | RID\$D906(Phase6) |            |           |                 |
| erasing function | privacy information of itself. |                   |            |           |                 |

# [Requirement: PPIREQ\_01003]

If the target ECU receives the subFunction - startRoutine request of personal and privacy information erasing from the tool during IG-ON, the target ECU shall erase personal and privacy information of itself.

# [Requirement: PPIREQ\_01004]

If IG is turned OFF during erasing personal and privacy information, the target ECU shall stop erasing personal and privacy information.

# [Requirement: PPIREQ\_01005]

If the target ECU receives the subFunction - startRoutine request of personal and privacy information erasing during erasing personal and privacy information, the target ECU shall continue the erasing process of personal and privacy information.

#### [Requirement: PPIREQ\_01006]

If the target ECU receives the subFunction - requestRoutineResults request, the target ECU shall respond with the control status of the state transition as indicated in 4.1.1.2.

# [Requirement: PPIREQ\_01007]

subFunction - stopRoutine shall not be supported. If the target ECU receives the stopRoutine request, the target ECU shall respond with a negative response (NRC 0x12). If personal and privacy information is being erased, the target ECU shall continue the erasing process of personal and

|  |  |  | a                   |            |

privacy information.

# [Requirement: PPIREQ\_01008]

If the session transfer occurs, the process shall be continued. The target ECU shall not execute the state transition, and if personal and privacy information is being erased, the target ECU shall continue the erasing process of personal and privacy information.

### 4.1.1.2. State Transition

# [Requirement: PPIREQ\_01009]

The state transition in the personal and privacy information erasing function shall comply with Fig. 4-1 and Table 4-2.

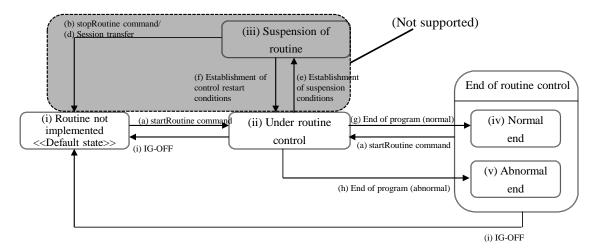

Fig. 4-1 State Transition Diagram of Personal and Privacy Information Erasing

The operation in each state shall be as follows:

# Operation in each state

- (i) Routine not implemented
  - No processing is implemented.
- (ii) Under routine control
  - The target ECU shall execute erasing of personal and privacy information.
- (iii) Suspension of routine
  - This is not supported by this function.
- (iv) Normal end
  - No processing is implemented.
- (v) Abnormal end
  - No processing is implemented.

4.2. MM(Multi-Media)-specific requirements for Personal and Privacy information
This section indicates the requirements for MM. The requirements described in this chapter are
applied to target ECU and target timing of implementation bellow.

<Target ECU>

MM

<Target timing of implementation>

· MM: 21CY and later

4.2.1. Security protection Requirements of Personal and Privacy information for MM This subsection indicates Security protection Requirements of Personal and Privacy information for MM.

# [Requirement: PPIREQ\_02004]

• User authentication shall be able to be set by user operation via the UI of the MM when the +B power is ON. During the period from when the +B power is turned ON until the user authentication is successfully completed, MM shall not output/display personal and privacy information to the UI of MM or Data Output I/F of MM for user.

#### [Requirement: PPIREQ\_02005]

• Permission and prohibition of outputting/displaying of personal and privacy information of the MM shall be set by user authentication via the UI of the MM.

#### [Requirement: PPIREQ\_02006]

· When personal and privacy information is outputted via wireless I/F, the communication path shall be encrypted.

#### [Requirement: PPIREQ\_02007]

• If personal authentication function (e.g., FIDO authentication) is provided to the MM, information entered by a certain user should not be able to be viewed by other users via the UI of the MM. However, this is a recommended item.

# [Requirement: PPIREQ\_02008]

· When MM stores the information is subject to saving with encryption defined in Upper-level Document[1] in a non-volatile memory, the information shall be saved after being encrypted. A

| In-vehicle Network   | Requirements of Personal and Privacy Information |  |                           |  |
|--|--|--|---------------------------|--|
| Application: ECUs which process personal and privacy information |  |  | SEC-ePF-PPI-REQ-SPEC-a00- |  |

tamper-resistant security chip shall be used for protection of an encryption key and encryption processing.

# [Requirement: PPIREQ\_02009]

• Personal and privacy information shall be authenticated and encrypted in case of outputting via In-vehicle LAN communication connector (Personal property information: Mandatory, other than Personal property information: Recommendation).

# [Requirement: PPIREQ\_02010]

• When personal and privacy information is outputted in an area of an external storage medium etc., where it is easily retrievable and readable by the user, the data shall be encrypted.

However, in the case where the service assumes that the information is taken out to the outside of the vehicle by the user, such as when browsing the information via home computer, it doesn't not have to be encrypted.

# [Requirement: PPIREQ\_02011]

· Personal property information shall not be outputted/displayed via the UI of the MM.

# [Requirement: PPIREQ\_02012]

• Personal property information shall not be outputted via the DLC.

#### [Requirement: PPIREQ\_02013]

• Personal property information shall not be outputted to an area of an external storage medium, etc., where it is easily retrievable and readable by the user.

#### 4.2.2. Erasing Requirements of Personal and Privacy information for MM

This subsection indicates erasing Requirements of Personal and Privacy information for MM.

#### [Requirement: PPIREQ\_02014]

• When the information subject to data erasing defined in Upper-level Document[1] is stored in the memory, the data shall be able to be erased using a method of complete erasing by user operation via the UI of the MM. See Upper-level Document[1] for the erasing requirements(including requirements of complete erasing).
